College of Computing
Sungkyunkwan University

Software Exercise: Web Programming Lab
MIDTERM PROJECT
Due date: October 27

Name	오민재	Student ID	2020314754

1. Introduce your website. Write some descriptions of your website's main features and contents.

My website is to introduce LANY, an American indie pop band.
In the main page, there is nav bar so that users of this website can know what contents there are, and also shows an image of Lany, so that the users can know how they look like.
The website provides information about tracks in Lany's album, official music videos, and schedules of world tour in October and November. The website enables the user to go to the official online shop which sells the official goods(ex, t-shirts, albums etc.) of Lany.

2. Describe your choice of design. Why does your website have a looking good design?

index.html:
I've used flexbox module to build navigation bar.
album.html:
I've used the gridbox module to show the tracks of Lany's album. By placing the list of tracks under the cover of album, users will be able to know the discography of Lany easily and fastly.
video.html
I've used the gridbox module to show the official videos of Lany's songs. By placing the videos under the cover of albums, and writing the title of songs under the videos, they can effectively play the videos they want by finding the topics.
tour.html:
I've used the gridbox model to show the tour schedule by making calendar, which is the most intuitive way to show the schedule to the users.
My website is a looking good design because it allows the users to easily and fastly find the information they need.

3. Describe how does your HTML files link to each other. You may draw the structure of web directory.

HTML files are linked through the menus in navigation bar in index.html
Click ALBUM: index.html → album.html
Click VIDEO: index.html → video.html
Click TOUR: index.html → tour.html
Click SIGN UP: index.html → form.html

4. Show, with screenshots, how your website is responsive.

index.html: image size, font size changed

index.html --> font-family: 'Fruktur', cursive;
album.html, video.html --> font-family: 'Creepster', cursive;
tour.html --> font-family: 'Black And White Picture', sans-serif;</td></tr>
</table>

	form.html --> font-family: 'Lobster', cursive;
	Location: index.html, album.html, video.html, tour.html, form.html
Flexbox module	Screenshot of result
	index.html
	Explanation
	Flexbox module is used to navigation build navigation bar in index.html.
	Location: index.html
Gridbox module	Screenshot of result
	album.html
	video.html 	tour.html

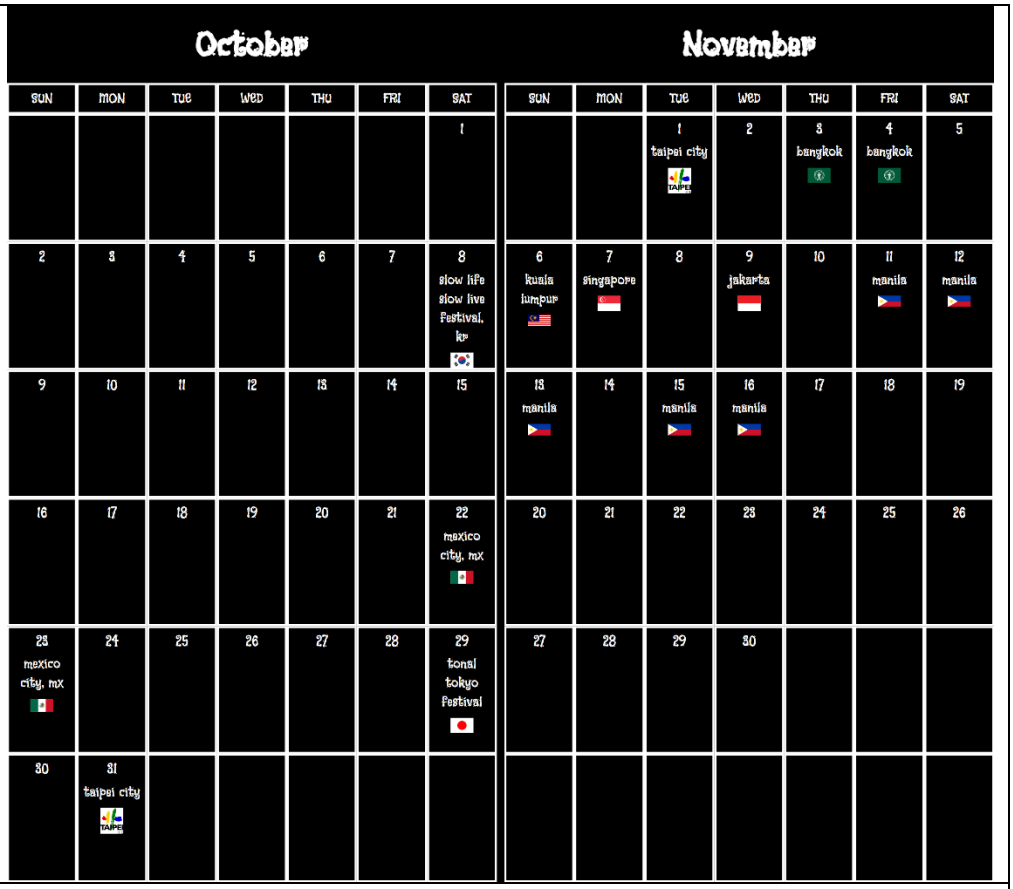
<table>
<tr><td rowspan="4"></td><td>



</td></tr>
<tr><td>Explanation</td></tr>
<tr><td>album.html
Grid box modules is used to show the list of albums.
video.html
Grid box modules is used to show the list of official videos.
tour.html
Grid box modules is used to show the tour schedule.</td></tr>
<tr><td>Location: album.html, video.html, tour.html</td></tr>
<tr><td>Transform</td><td>Screenshot of result</td></tr>
<tr><td></td><td>Before writing something to the input box</td></tr>
</table>

After writing something to the input box

```css
label .label-text {
  display: inline-block;
  color: black;
  font-size: 20px;
  transform: translateY(-34px);
  transition: all 0.3s;
}

label input:focus + .label-text, label input:valid + .label-text {
  color: white;
  font-size: 18px;
  margin-top: 10px;
  transform: translateY(-84px);
}
```

Explanation

The position of labels of inputs is changed by using transform and transition attribute.

Location: form.html

Transition

Screenshot of result

```css
label .label-text {
  display: inline-block;
  color: black;
  font-size: 20px;
  transform: translateY(-34px);
  transition: all 0.3s;
}

label input:focus + .label-text, label input:valid + .label-text {
  color: white;
  font-size: 18px;
  margin-top: 10px;
  transform: translateY(-84px);
}
```

Explanation

The position of labels of inputs is changed by using transform and transition attribute.

Location: form.html

Animation

Screenshot of result

index.html

	 tour.html
	Explanation
	index.html: iterating blink animation. tour.html: iterating zoom animation
	Location: index.html, tour.html

6. You can describe more about your website here. (Optional, free-form)
